

Programme

Sunday 23rd

19.00 **Delegates Arrive Dinner**
at Restaurant "Szara Gęś" (Grey Goose), 17 Market Square

Monday 24th

Venue: Jagiellonian University, Aula Collegium Medicum, 12 St. Anny Street

- 9.45 **Welcome address**
Prof. Tom Guzik and Vice-Rektor UJ **Tomasz Grodzicki**
- 10.00-10.30 **Prof. Tom Lüscher** EIC European Heart Journal, Zurich, London, UK
New directions of cardiovascular research – continuum from basic to clinical science
- 10.30-10.45 DISCUSSION
- 10.45-11.15 **Prof. Gianluigi Condorelli** Humanitas Institute, Milan, Italy
New Directions of cardiovascular research in heart failure
- 11.15-11.30 DISCUSSION
- 11.30-12.00 **Prof. Jeremy Pearson** ESC CBCVS past-chair; Deputy Director of British Heart Foundation, London, UK
Funding the future of cardiovascular research – British Heart Foundation and ESC perspective
- 12.00-12.15 DISCUSSION
- 12.15-12.45 **Prof. David G. Harrison** Deputy Editor, Vanderbilt University Medical Center, Nashville, USA
From ST segments to endothelial pathophysiology – what do past stories of translation teach us?
- 12.45-13.00 DISCUSSION
- 13.00-13.45 **Lunch basement Collegium Medicum, 12 st. Anny Str.**
- 13.45-15.30 **Updates on Journal status and development**
- 13.45-14.20 **Prof. Tom Guzik** Editor in Chief update
- 14.20-14.45 **Dr Heather Small** Senior Managing Editor
- 14.45-15.00 **Prof. Charalambos Antoniades** Cardiovascular Research OnLife
- 15.00-15.30 **Mr Adam Gilbert** Oxford University Press update
- 15.30-16.00 Refreshments
- 16.00-17.30 OPEN DISCUSSION ON JOURNAL STRATEGY led by **Prof. Tom Guzik**
- 18.00 **Dinner and visit to the Museum at the Jagiellonian University, Collegium Maius, 15 Jagiellonska Street**
This is the oldest part of the University, where dinners and celebrations have taken place since the 14th Century.

Tuesday 25th

Venue: Jagiellonian University, Aula Collegium Maius, 15 Jagiellonska Street

- 09.00-09.30 **Prof. Franz Messerli** Director of Hypertension program, St Luke's-Roosevelt Hospital, Bern, New York
Translating Cardiovascular Research – how can basic science help our patients
- 09.30-09.45 DISCUSSION
- 09.45-10.00 Refreshments. Continuing visit of the Museum
- 10.00-12.15 DISCUSSION in the Aula of Collegium Maius
- 12.15-13.15 **Lunch basement Collegium Medicum, 12 st. Anny Str.**
- 14.00 **Sightseeing: Auschwitz – Castle and old town**
- 20.00 **Dinner**
at the Restaurant in Hotel Pod Różą, 14 Floriańska Str.

Wednesday 26th

Delegates Depart

Senior Advising Editors

Barbara Casadei, UK	Peter Libby, USA
Anna Dominiczak, UK	Joseph C. Wu, USA
Goran Hansson, Sweden	Salim Yusuf, Canada

International Editors' Symposium

New Frontiers in Cardiovascular Research

Krakow, Poland

June 24-25, 2019

Cardiovascular Research

Dear Friends,

On behalf of **Cardiovascular Research**, it is our great pleasure to welcome you to Krakow for "New Frontiers in Cardiovascular Research 2019", our International Editor's Symposium. We are very grateful that you have accepted our invitation and hope that the next two days will be productive and enjoyable for us all. As indicated by the title of our meeting, we hope that it will give us not only an opportunity to update you on how **Cardiovascular Research** has been developing, but also to discuss and identify new areas and topics of interest within the dynamic field of cardiovascular medicine. We have reserved time for discussion, and we would really appreciate hearing your opinions concerning where our field is now and where it is going. The discussions will be initiated by brief invited presentations which will outline the landscape of Cardiovascular Research from a variety of perspectives. These include those of the European Society of Cardiology; top Cardiovascular Journals; the American Heart Association, as well as European grant funding bodies. We are very grateful to the speakers for accepting our invitation and joining us here in Krakow.

We chose this location for our meeting, as it is not only of huge historical value as one of the oldest Universities in Europe, but also as Krakow is one of the most important historical, cultural and tourist centers of Poland that has rapidly developed over the past decade. It is one of the most vibrant cities in Central Europe. We hope that the location of our meeting, where Nicolaus Copernicus and Karol Olszewski accomplished their seminal works, will inspire active and fruitful discussions.

We would like to extend a warm welcome to you and we hope you have a memorable time at our Symposium.

On behalf of the Editorial Team,

Tomasz Guzik

Prof. Tomasz Guzik, FRCP, FESC
Editor-in-Chief

Places

Collegium Nowodworski

– building of the Jagiellonian University located at ul. Św. Anny 12. Bartłomiej Nowodworski (hence the name) bequeathed the building to the university for the first secular secondary school existing at the university from 1586. Nowodworski's college architecturally refers to the Late Gothic Collegium Maius, and is famous for its arcaded baroque courtyard.

High school in 1898 moved to a new location at pl. Na Groblach. Nowodworski Collegium was made available to the Jagiellonian Library, and from 1949 to the then Medical Academy (today's Collegium Medicum).

The Aula

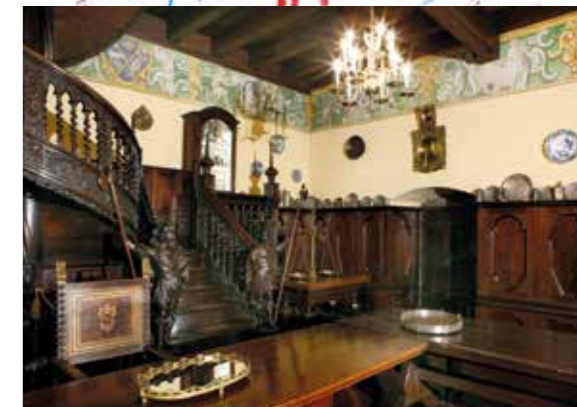

The old theologians lecture room belongs to the oldest part of Collegium Maius. It is located on the site of the tenement house owned by Pęcherz of Rzeszotary, which was purchased by King Ladislaus the Jagiellonian and bequeathed to the University in 1400. Over the centuries theology lectures were given here, and currently it still serves the University as a stately assembly room. The Aula is a place for honorary degree and post-doctoral degree (habilitation) ceremonies, but also for conferences and music concerts. The inscription engraved on the stone portal reads Plus ratio quam vis ("Let reason rule and not might") and now this is the Jagiellonian University's official motto.

Stuba Communis

Up to the 18th century European scholars lived in colleges. Collegium Maius hosted theologians and some liberal arts professors.

Stuba Communis is the common room built in 1430, where twice a day all would meet for meals and sometimes for discussion. Like in the medieval period, three tables forming a horseshoe still stand here. There is an oriel opposite to the tables, where once the youngest of all the scholars would read the Holy Bible and excerpts from the works of the Church Fathers. Academic life in the past was similar to that of a monastic community.

Libreria

From the early 16th century the university library was located here. The room was once also called the Obiedziński room, named so after a professor who had donated a considerable amount of money for its construction. At present, the Libreria serves as the entrance to the main exhibition. Specific for its interior is the late-Gothic cross ceiling. A gilded Gothic-style portal called the Golden Gate (Porta Aurea) leads into the vestibule. Today the Libreria serves as the location for University Senate meetings.

Szara Gęś Restaurant

The restaurant is located in one of the most beautiful tenements in the heart of the Krakow Market Place. Its interiors are distinctively connected with the historic character of the building. The restaurant is set beneath a gothic, cross-shaped coping, where the carvings on the vault keystones are representative of the magnates of the region.

Pod Różą Restaurant

Pod Różą Restaurant inspired by international influences, has been boasting its own cuisine for over 20 years. You will also find here a modern touch to Polish traditions and a shortage of regional and seasonal products. The renown of our restaurant, located in the oldest Hotel in Krakow, has been appreciated by many prominent guests at the highest level. Our cuisine is famous for its own production.
